Subject: Old Landfill GIS Shapefile

Wayne,

You made a request sometime in the past to obtain a copy of a GIS shapefile of the old landfill disposal areas in your county.

The data is now available at:

http://portal.ncdenr.org/c/document_library/get_file?p_l_id=116721&folderId=364024&name=DLFE-30316.zip

Please note this is not our final determination of the actual disposal area but an estimate based on historical information.

Cheryl Marks, Pre-Regulatory Landfill Unit Supervisor
Inactive Hazardous Sites Branch, Superfund Section
1646 Mail Service Center
Raleigh, NC 27699-1646
(919) 508-8465

Asheboro, NC 27204-4728

Subject: Pre-Regulatory Landfill Sites in Randolph County

Dear Mr. Wells:

The General Assembly of North Carolina enacted Senate Bill 1492 which created a program to assess the public health and environmental hazards at landfill and dump sites that operated prior to 1983 and to develop and implement remedial action plans at sites requiring remediation. The Pre-Regulatory Landfill Unit (Unit) was created in the Inactive Hazardous Sites Branch (IHSB) to oversee these activities. The purpose of this letter is to make you aware of the sites identified in your county and to provide general guidance of relevant state statutes.

Based on the information obtained by the Unit, the sites listed below tentatively qualify under Senate Bill 1492. The approximate locations are shown in the attached map.

<u>ID Number</u>	<u>Site Name</u>	<u>Site Address</u>
NCD980557557	Asheboro Municipal LF	Off Old US 64
NCD986197374	Old Randleman Town Dump	Walker Mill Rd.
NONCD0000506	Ramseur	339 Ramseur Julian Rd
NONCD0000507	Seagrove Dump	E Of 5377 Ridge Rd
NONCD0000508	Franklinville Dump	Sunset Ave.
NONCD0000510	C.A. Bowers Dump	3904, 3906 Fuller Mill Rd
NONCD0000511	Randleman Dump	3475 Applewood Rd
NONCD0000512	Liberty Dump	5876 Sandy Creek Church Rd
NONCD0000513	Modern Garbage Dump	1200 Fox Country
NONCD0000662	Pleasant Ridge (Burgess Dump)	Parkwood Rd
NONCD0000663	Coleridge	4930 NC 22/NC 42

Work at these sites may be performed using the Unit's resources or through local government actions. The Unit has prioritized the sites statewide based on their threat to public health and the environment and will perform assessments and implement remedial actions based on this priority. Local governments may

opt to perform the work at any time under the guidance of the Unit. Reimbursement of local government costs may be available for assessments and remedial actions to abate an imminent hazard as funds are available. The conditions for reimbursement include approval of the assessment and remediation plan by the Unit and certified accounting of costs. A document, *IHSB Guidelines for Addressing Old Landfills & Dumps*, was developed to assist local governments and the Unit in this work. It is available on our web site, <http://portal.ncdenr.org/web/wm/sf/ihs/ihsguide>.

An additional purpose in notifying you of these sites is to provide information to assist in your responsibilities in the permitting of private drinking water wells. The General Assembly enacted legislation which required local health departments to implement programs for the permitting, inspecting, and testing of private drinking water wells by July 1, 2008. State well construction standards in 15A NCAC 2C require a minimum horizontal separation of 500 feet between a water supply well and a landfill or disposal site. More precise location information for the sites in your county may be requested from the Unit.

If you are aware of additional sites, have additional information on the identified sites, or need further information, please contact me at (919) 508-8473.

Sincerely,

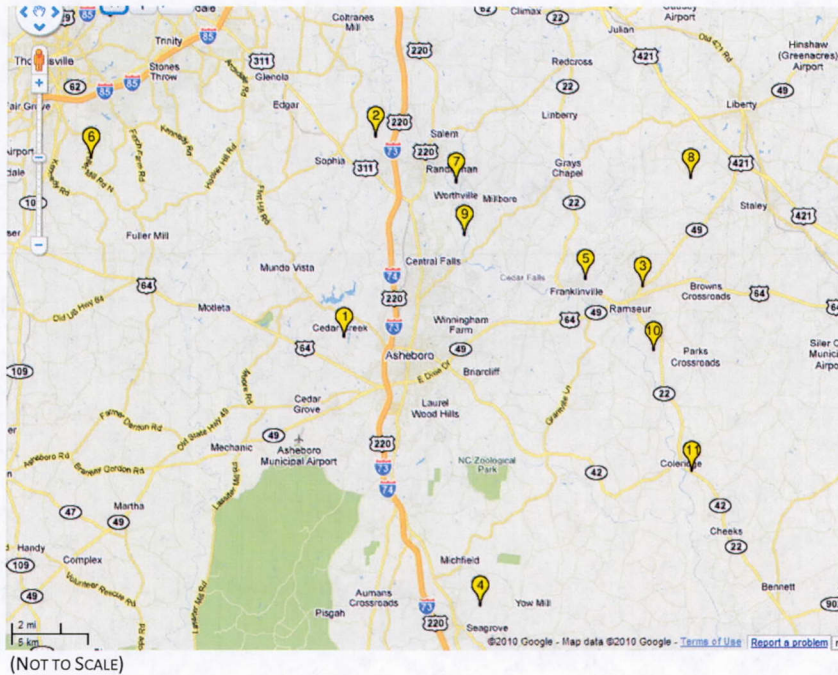

Patricia M. Backus, P.E.

<SAL> <FIRST> <LAST>, County Manager
County of <MUNICIPALITY>
<ADDRESS>
<TOWN>, North Carolina <ZIP>

Subject: Assessment, Cleanup, and Redevelopment of Old Landfill Sites Within Your Jurisdiction

Dear <SAL> <LAST>:

Governor Easley released his proposed budget February 22, 2007. Included in the budget is a specific item I believe should be of interest to you from a fiscal, environmental and public health protection perspective.

There are approximately 700 old landfills statewide and <LANDFILL#> old landfills in your local area that closed before the State permitting system became effective. These landfills are listed on the Old Landfill Sites portion of the Inactive Hazardous Sites Inventory maintained by the Superfund Section, Division of Waste Management. Any person, including local governments, that arranged for disposal or disposed of waste in the landfills may be held liable for the cleanup of the site. I have attached a report that identifies the location of known old landfill sites in <COUNTY NAME> County that may have closed prior to 1983 and thus qualify for the program described in this letter.

The Division has surveyed old landfills in 47 counties. The results of the survey indicate reason for concern about potential public health and safety impacts of these sites if they are not addressed. Seventy percent of the sites surveyed had a school, church, residence, day care or drinking water source within 1000 feet. The Division has found 102 old landfills that have a drinking water well within 500 feet. Thirteen of the landfills surveyed have residences built over the old landfill. The cost of assessment and cleanup of these old landfill sites can be as high as several million dollars.

Governor Easley's budget establishes a partnership between the State and local governments to both clean up the old landfill sites and provide funding for redevelopment of the sites. Many are in prime locations for redevelopment opportunities. The Governor's budget proposes to pay for cleanup and redevelopment of these sites through a surcharge on disposal of solid waste. The funding mechanism is a fair one. It is based on the idea that those who use solid waste disposal facilities should share responsibility for cleanup of sites used for solid waste disposal in the past that may have been lawful at the time, but did not meet standards that we now know are necessary to protect public health and safety.

The proposed \$2.00 per ton disposal surcharge would apply to residential, commercial, industrial, and construction and demolition debris type waste that is either disposed at a landfill or passes through a transfer station for disposal out-of-state. The State would use revenue from the surcharge to contract for cleanup of the old landfill sites and to provide grants to local government for redevelopment. The funds could also be used across the state to clean up other hazardous substance disposal sites that have no viable responsible party.

The only tool currently available to the State to ensure cleanup when it is needed is an enforcement action against those who owned, operated, or contributed to old landfills. The Governor's proposal would avoid placing an unreasonable

burden on any one local government and allow us to use our resources for actual cleanup rather than legal action. When old landfill sites were in use, North Carolina citizens, businesses, and industries benefited from their existence as a place to dispose of waste. The surcharge on waste disposal is a way for citizens, businesses, and industries to form a partnership for cleanup and redevelopment of these old landfill sites.

There is great interest this session of the General Assembly in strengthening requirements for landfills permitted in North Carolina. I encourage you to take a close look at legislation that will be introduced, specifically this initiative and what it can bring to your jurisdiction.

If you have questions regarding the program for clean-up of old landfills, please contact Jack Butler, Chief of the Superfund Section, at jack.butler@ncmail.net or call (919)508-8450.

Sincerely,

A handwritten signature in dark ink, appearing to read "Dexter R. Matthews". The signature is fluid and cursive, with the first name "Dexter" being more prominent.

Raleigh, NC 27699-1646

SUBJECT: State Contract No.: N06009S; Schnabel Project No.: 06211002.02-00
NONCD 0000509 Asheboro Dump
Letter Report

Dear Ms. Marks:

Based on our assessment, we have evidence that the assigned site NONCD 0000509 is the same site as the City of Asheboro's "Old City Landfill".

Our assigned site is reported to be located on Old Lexington Road, 3 miles west of town, at Latitude 35.7138 and Longitude -79.8691 (per the Inventory Record, attached). Following these directions, going three miles west of Asheboro on Old Lexington Road, then turning south towards the location of the latitude/longitude coordinates listed on the Inventory Record, ends very near the "City of Asheboro Old City Landfill", as shown on the attached survey plat map.

A map of the site is attached showing approximate GPS coordinates outlining the Disposal Area that our staff visited on February 14, 2006. The area enclosed by these GPS points is 25.2 acres.

We received some material from the City of Asheboro, including the "Final Screening Site Inspection Report, Asheboro Municipal Landfill, Asheboro, NC, EPA ID#NCD980557557" prepared for the EPA by NUS Corp on April 18, 1989. The site location map and report cover page from this document is attached. The site was reportedly open from 1947 to 1976 and is 12 acres in size. Additional references were transmitted to us by the City of Asheboro. These materials are listed on the attached references list, and are included as pdf files on the attached CD.

We interviewed Dave Townsend, Department of Public Works at Randolph County, and he stated that he knew of the Asheboro site and lived nearby. In addition, Mr. Kermit Williamson, City Sanitation Department with the City of Asheboro, was familiar with the site. Both of these people indicated that there were no other dumps in the near vicinity that met the description of the Asheboro Dump on the Inventory Record.

We review the aerial photographs in the vicinity of the latitude/longitude coordinates from 1957, 1966 and 1980 and did not observe features suggesting another landfill.

"We are committed to serving our clients by exceeding their expectations."

Geotechnical • Construction Monitoring • Dam Engineering • Geoscience • Environmental

The location, size, and start of operation date of the two sites are similar. Based on this information, it appears that our staff visited the EPA site that NUS documented and that this is the correct location given the information from the Inventory Record. There appears to be only one site.

If you need additional information concerning this site, or have any questions, please call.

Sincerely,

Gary D. Rogers, P.G.

Associate

Re: Request for Information on old unlined landfills, Randolph County.

Dear Mr. Willis,

The Division of Waste Management, Superfund Section, Inactive Hazardous Sites Branch (Branch) is in the process of cataloging old landfills in the state. This letter is being sent to you to solicit your cooperation in providing information on old unlined landfills that are not subject to Division of Waste Management, Solid Waste Section post-closure regulations in your county. This process is a part of a statewide effort to accurately inventory old dumpsites to aid in safe reuse and to protect public health and the environment.

Once an old landfill site has been identified, the site location, site usage, and vicinity usage is researched. Potential hazards to the public and the environment are then evaluated by risk assessment. Sites then are reviewed based on risk and/or by safe redevelopment requests.

The Branch then works with owners and responsible parties on final solutions for containment of the waste and to ensure safe reuse of the old landfill sites. Safe reuse might involve engineering controls to prevent exposure to wastes, if necessary, and restrictive covenants limiting the property to certain uses and setting conditions for construction or other soil disturbing activities. Annual reporting that restrictive covenants remain in place will be a duty of the current owner.

Known old landfills/dump sites are maintained in a database. Attached is a listing of known sites located in your county. Available information that may include location and years of operation information for each site is also listed. Please review the list and verify or provide information that will more accurately characterize the site(s). If you have knowledge of sites not included on the list, please add the additional sites along with location information, directions, years of operation, and any additional notable information.

Please return the list and any additional information within 90 days to:
